DETAILED ACTION

Election/Restrictions

1. This application is a 371 of PCT/FR99/00915. For applications filed under 371, PCT rules for lack of unity apply. The European Search Report cited prior art (FR 2 700 628 A) based on which the instant claims are anticipated and lack special technical feature. Hence the Restriction requirement is proper.

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-23, 28-35, 42-64 and 69-72, drawn to a process for amplifying a reaction

Group II, claim(s) 24-27, 36-41 and 65-68, drawn to a device or system for detecting the presence of a substance.

The inventions I and II do not meet the requirements for unity of the invention for the following reasons. The inventions do not share the special technical feature, which defines a contribution to which each of the inventions makes over the prior art.

Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process in Invention I can be used in a materially different

Art Unit: 1656

processes such as hybridization assays. The device in Invention II can be used in a materially different system such as radio transmitters etc.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and the search for one group is not required for any other group, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
